

Executive Summary

This particular site was placed on the Comprehensive Emergency Response Compensation and Liability Act's Information System (CERCLIS) as a result of a complainant "hot line" call being sent to the United States Environmental Protection Agency on February 14, 1980. In this particular instance the location of the site was erroneously identified as Route 121 North Side Lost Creek Township.

An extensive review of State and Federal EPA files and personnel interviews with property owners has provided information on the correct location of the site. The Dump in Mt. Zion is actually located on the NW $\frac{1}{4}$  of the NW $\frac{1}{4}$  of Section 33, Township 16 north Range 3 east. On the property of a Mr. Warren Jesek. (see map)

On October 3, 1979 the Illinois Environmental Protection Agency received a call of illegal dumping activity on the Warren Jesek property. At that time a regional field representative, and local public health official traveled to the site to investigate the alleged activity and interview the responsible party. The on-site inspection revealed the presences of concrete, building materials and core sands. Site access was unrestricted and the dumped materials were uncovered.

As a result of this investigation a state compliance inquiry letter was sent to the owner and a series of two follow-up inspections conducted. These investigations revealed that the debris has since been leveled and graded with appropriate earthen fill.

Although the dump was not formally authorized or permitted by the States Environmental Protection Agency, this investigation has revealed that materials disposed of at this site were non-hazardous concrete, core sands and building demolition refuse.

It is therefore recommended, that the facility be identified as a low priority action site, and that no further action is necessary unless such time arises that additional documented information becomes available.
